

CAMPHENE

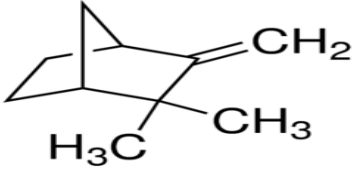

INTRODUCTION:

Camphene is an isomerization product of Pinene.

APPLICATION:

Camphene is used in F&F, Pharmaceuticals and Coatings

PRODUCT CHARACTERISTICS:

| Sr. No. | Characteristic | Requirements |
|---------|--------------------------------|---|
| 1 | Description at less than 43°C | White Waxy Solid |
| 2 | Chemical Name | Camphene |
| 3 | Structural Formula |  |
| 4 | Molecular Formula | C ₁₀ H ₁₆ |
| 5 | Molecular Weight. | 136.23 g/mol |
| 6 | Specific Gravity at 50°C | 0.8400 – 0.8550 |
| 7 | Purity (Camphene + Tricyclene) | Min. 95.0 % |

SHELF LIFE:

1 Year

STORAGE:

Jacketed Tank

PACKING:

20 KL Isotank
